

NAME

nstat, rtacct - network statistics tools.

SYNOPSIS

Usage: nstat [-h?vVzrnasd:t:jp] [PATTERN [PATTERN]]

Usage: rtacct [-h?vVzrnasd:t:] [ListOfRealms]

DESCRIPTION

nstat and **rtacct** are simple tools to monitor kernel snmp counters and network interface statistics.

OPTIONS

-h, --help Print help

-V, --version
Print version

-z, --zeros
Dump zero counters too. By default they are not shown.

-r, --reset
Reset history.

-n, --nooutput
Do not display anything, only update history.

-a, --ignore
Dump absolute values of counters. The default is to calculate increments since the previous use.

-s, --noupdate
Do not update history, so that the next time you will see counters including values accumulated to the moment of this measurement too.

-j, --json
Display results in JSON format.

-p, --pretty
When combined with **--json**, pretty print the output.

-d, --scan <INTERVAL>
Run in daemon mode collecting statistics. <INTERVAL> is interval between measurements in seconds.

-t, --interval <INTERVAL>
Time interval to average rates. Default value is 60 seconds.
