

NAME

FcFontSetMatch – Return the best font from a set of font sets

SYNOPSIS

```
#include <fontconfig/fontconfig.h>
```

```
FcPattern * FcFontSetMatch (FcConfig *config, FcFontSet **sets, intnsets, FcPattern *pattern, FcResult *result);
```

DESCRIPTION

Finds the font in *sets* most closely matching *pattern* and returns the result of **FcFontRenderPrepare** for that font and the provided pattern. This function should be called only after **FcConfigSubstitute** and **FcDefaultSubstitute** have been called for *pattern*; otherwise the results will not be correct. If *config* is NULL, the current configuration is used. Returns NULL if an error occurs during this process.
