

**NAME**

`zlib_decompress` – decompress `mysqlpump` ZLIB-compressed output

**SYNOPSIS**

`zlib_decompress input_file output_file`

**DESCRIPTION**

The **zlib\_decompress** utility decompresses **mysqlpump** output that was created using ZLIB compression.

**Note**

If MySQL was configured with the **-DWITH\_ZLIB=system** option, **zlib\_decompress** is not built. In this case, the system **openssl zlib** command can be used instead.

Invoke **zlib\_decompress** like this:

```
shell> zlib_decompress input_file output_file
```

Example:

```
shell> mysqlpump --compress-output=ZLIB > dump.zlib
```

```
shell> zlib_decompress dump.zlib dump.txt
```

To see a help message, invoke **zlib\_decompress** with no arguments.

To decompress **mysqlpump** LZ4-compressed output, use **lz4\_decompress**. See **lz4\_decompress(1)**.
