

NAME

systemd-importd.service, systemd-importd – VM and container image import and export service

SYNOPSIS

systemd-importd.service

/lib/systemd/systemd-importd

DESCRIPTION

systemd-importd is a system service that allows importing, exporting and downloading of system images suitable for running as VM or containers. It is a companion service for **systemd-machined.service(8)**, and provides the implementation for **machinectl(1)**'s **pull-raw**, **pull-tar**, **import-raw**, **import-tar**, **export-raw**, and **export-tar** commands.

See the [importd D-Bus API Documentation](#)^[1] for information about the APIs systemd-importd provides.

SEE ALSO

systemd(1), **machinectl(1)**, **systemd-machined.service(8)**, **systemd-nspawn(1)**
