

NAME

udisksd – The udisks system daemon

SYNOPSIS

udisksd [**--help**] [**--replace**] [**--debug**] [**--no-sigint**] [**--force-load-modules**]

DESCRIPTION

The **udisksd** program provides the *org.freedesktop.UDisks2* name on the system message bus. Users or administrators should never need to start this daemon as it will be automatically started by **dbus-daemon**(1) or **systemd**(1) whenever an application tries to access its D-Bus interfaces.

See the **udisks**(8) man page for more information.

OPTIONS**--help**

Show help options.

--replace

Replace existing daemon.

--debug

Print debug or informational messages on stdout/stderr.

--no-sigint

Do not handle SIGINT for controlled shutdown.

--force-load-modules

Activate modules on startup

AUTHOR

This man page was originally written for UDisks2 by David Zeuthen <zeuthen@gmail.com> with a lot of help from many others.

BUGS

Please send bug reports to either the distribution bug tracker or the upstream bug tracker at <https://github.com/storaged-project/udisks/issues>.
