

**NAME**

FcDirSave – DEPRECATED: formerly used to save a directory cache

**SYNOPSIS**

```
#include <fontconfig/fontconfig.h>
```

```
FcBool FcDirSave (FcFontSet *set, FcStrSet *dirs, const FcChar8 *dir);
```

**DESCRIPTION**

This function now does nothing aside from returning FcFalse. It used to create the per-directory cache file for *dir* and populate it with the fonts in *set* and subdirectories in *dirs*. All of this functionality is now automatically managed by FcDirCacheLoad and FcDirCacheRead.
