

## NAME

XML::XPathEngine::Boolean – Boolean true/false values

## DESCRIPTION

XML::XPathEngine::Boolean objects implement simple boolean true/false objects.

## API

### **XML::XPathEngine::Boolean->True**

Creates a new Boolean object with a true value.

### **XML::XPathEngine::Boolean->False**

Creates a new Boolean object with a false value.

### *value()*

Returns true or false.

### *to\_literal()*

Returns the string “true” or “false”.
