

NAME

XdbeGetBackBufferAttributes - returns attributes of a DBE buffer.

SYNOPSIS

```
#include <X11/extensions/Xdbe.h>
```

```
XdbeBackBufferAttributes *XdbeGetBackBufferAttributes(  
    Display *dpy,  
    XdbeBackBuffer buffer)
```

DESCRIPTION

This function returns the attributes associated with the specified buffer.

The *XdbeBackBufferAttributes* structure has the following fields:

Window window window that buffer belongs to

If buffer is not a valid *XdbeBackBuffer*, window returns None.

The returned *XdbeBackBufferAttributes* structure can be freed with the Xlib function **Xfree()**.
