

NAME

Git::Wrapper::Exception – Exception class for Git::Wrapper

VERSION

version 0.048

SYNOPSIS

A new error object may be generated and thrown as follows:

```
die Git::Wrapper::Exception->new(
    output => \@out,    # STDOUT
    error  => \@err,    # STERR
    status => $? >> 8,  # git process exist status
);
```

METHODS**new**

The standard constructor for this class.

error

Returns the full error message reported by the resulting git command sent to STDERR.

output

Returns the full output generated by the git command that is sent to STDOUT.

status

Returns the non-zero exit code reported by git on error.

SEE ALSO**Git::Wrapper**

In particular, see the section on Error handling.

REPORTING BUGS & OTHER WAYS TO CONTRIBUTE

The code for this module is maintained on GitHub, at <<https://github.com/genehack/Git-Wrapper>>. If you have a patch, feel free to fork the repository and submit a pull request. If you find a bug, please open an issue on the project at GitHub. (We also watch the <<http://rt.cpan.org>> queue for Git::Wrapper, so feel free to use that bug reporting system if you prefer)
