

NAME

FcDirCacheCreateUUID – Create .uuid file at a directory

SYNOPSIS

```
#include <fontconfig/fontconfig.h>
```

```
FcBool FcDirCacheCreateUUID (FcChar8 *dir, FcBoolforce, FcConfig *config);
```

DESCRIPTION

This is to create .uuid file containing an UUID at a font directory of *dir*. The UUID will be used to identify the font directory and is used to determine the cache filename if available.

SINCE

version 2.12.92
