

NAME

vorbistagedit – allows batch editing of vorbis comments with an editor

SYNOPSIS

vorbistagedit *file1* [*file2* [*file3* ...]]

vorbistagedit [--version|-V|-v]

vorbistagedit [--help|-h]

DESCRIPTION

vorbistagedit allows batch editing of vorbis comments with an editor. If more than one OGG Vorbis file is specified, **vorbistagedit** opens a unique editor for all files given. The supported file extensions for **vorbistagedit** are .oga, .ogg, .ogv, .ogx, and .spx.

OPTIONS

-v, -V, --version

Show the version of **vorbistagedit**.

-h, --help

Show a short help message.

SEE ALSO

vorbiscomment(1), *ogginfo(1)*

ENVIRONMENT**EDITOR**

Defines the default editor. If it's not defined, then *sensible-editor(1)* is used.

AUTHOR

vorbistagedit was written by Martin F. Krafft <vorbistagedit@pobox.madduck.net>.

This manual page was written by Francois Wendling <frwendling@free.fr> for the Debian project (but may be used by others).
