

NAME

pear.conf – configuration file for **PEAR** applications.

DESCRIPTION

The **pear.conf** is used by **PEAR** applications to store their configuration. This file should not be edited.

The **pear** command provides the **config-show**, **config-get** and **config-set** sub-commands needed to change the configuration.

FILES

/etc/pear.conf The system configuration file.

\$HOME/.pearrc
 The user configuration file.

SEE ALSO
