

NAME

cert2spc – Transform multiple X.509 certificates to a Software Publisher Certificate

SYNOPSIS

cert2spc *certificate* [*crl* [*certificate* [*crl* ...] *outputfile.spc*

DESCRIPTION

Combine a list of X.509 certificates or X.509 CRL (Certificate Revocation List) into a Software Publisher Certificate (PKCS#7 file). The SPC file is required for signing a PE file (like an assembly) using signcode.

PARAMETERS

certificate

One (or more) X.509 certificate to add (space separated).

crl

One (or more) X.509 CRL to add (space separated).

output.spc

Software Publisher Certificate to output. If the specified file exists it will be overwritten.
