

NAME

FcConfigSetRescanInterval – Set config rescan interval

SYNOPSIS

```
#include <fontconfig/fontconfig.h>
```

```
FcBool FcConfigSetRescanInterval (FcConfig *config, int rescanInterval);
```

DESCRIPTION

Sets the rescan interval. Returns FcFalse if the interval cannot be set (due to allocation failure). Otherwise returns FcTrue. An interval setting of zero disables automatic checks. If *config* is NULL, the current configuration is used.
