

NAME

list-unreleased – display UNRELEASED packages

SYNOPSIS

list-unreleased [*arg* ...] [*path* ...]

DESCRIPTION

Searches for packages whose changelogs indicate there are pending changes (UNRELEASED) and either lists them or displays the relevant changelog entry.

By default it searches for packages under the current directory. If a path is specified it will look for packages under that directory instead.

OPTIONS

- c** Display pending changes.
- R** Don't recurse into subdirectories looking for packages.
