

**NAME**

TIFFFieldName – Get TIFF field name from field information

**SYNOPSIS**

```
#include <tiffio.h>
```

```
const char* TIFFFieldName(const TIFFField* fp)
```

**DESCRIPTION**

**TIFFFieldName** returns the textual name for a TIFF field.

*fp* is a field information pointer previously returned by **TIFFFindField**, **TIFFFieldWithTag**, or **TIFFFieldWithName**.

**RETURN VALUES**

**TIFFFieldName** returns a constant C string.
