

NAME

ulockmgr_server – Lock Manager Server for FUSE filesystems

SYNOPSIS

ulockmgr_server

DESCRIPTION

Filesystem in Userspace (FUSE) is a simple interface for userspace programs to export a virtual filesystem to the Linux kernel. It also aims to provide a secure method for non privileged users to create and mount their own filesystem implementations.

ulockmgr_server is the Userspace Lock Manager Server for FUSE filesystems.

OPTIONS

ulockmgr_server has no options.

SEE ALSO

fusermount(1), *mount(8)*, *mount.fuse(8)*.

HOME PAGE

More information about **ulockmgr_server** and the FUSE project can be found at [<http://fuse.sourceforge.net/>](http://fuse.sourceforge.net/).
