

**NAME**

pydoc3.7 – the Python documentation tool

**SYNOPSIS**

**pydoc3.7** *name*

**pydoc3.7 -k** *keyword*

**pydoc3.7 -p** *port*

**pydoc3.7 -g**

**pydoc3.7 -w** *module* [...]

**DESCRIPTION**

**pydoc3.7** *name* Show text documentation on something. *name* may be the name of a Python keyword, topic, function, module, or package, or a dotted reference to a class or function within a module or module in a package. If *name* contains a '/', it is used as the path to a Python source file to document. If *name* is 'keywords', 'topics', or 'modules', a listing of these things is displayed.

**pydoc3.7 -k** *keyword* Search for a keyword in the synopsis lines of all available modules.

**pydoc3.7 -p** *port* Start an HTTP server on the given port on the local machine.

**pydoc3.7 -g** Pop up a graphical interface for finding and serving documentation.

**pydoc3.7 -w** *name* [...] Write out the HTML documentation for a module to a file in the current directory. If *name* contains a '/', it is treated as a filename; if it names a directory, documentation is written for all the contents.
