

NAME

File::HomeDir::MacOS9 – Find your home and other directories on legacy Macintosh systems

SYNOPSIS

```
use File::HomeDir;

# Find directories for the current user
$home      = File::HomeDir->my_home;
$desktop   = File::HomeDir->my_desktop;
```

DESCRIPTION

This module provides implementations for determining common user directories on legacy Mac hosts. In normal usage this module will always be used via File::HomeDir.

This module is no longer actively maintained, and is included only for extreme back-compatibility.

Only the my_home and my_desktop methods are supported.

SUPPORT

See the support section the main File::HomeDir module.
