

NAME

wineconsole – The Wine console

SYNOPSIS

wineconsole [*option*] *command*

DESCRIPTION

wineconsole is the Wine console manager, used to run console commands and applications. It allows running the console either in the current terminal (*curses*) or in a newly made window (*user*).

OPTIONS

--backend=*{user|curses}*

If *user* is chosen, a new window will be created for the console. The *curses* option will make wineconsole try to setup the current terminal as a Wine console.

BUGS

Bugs can be reported on the **Wine bug tracker** <<https://bugs.winehq.org>>.

AVAILABILITY

wineconsole is part of the Wine distribution, which is available through WineHQ, the **Wine development headquarters** <<https://www.winehq.org/>>.
