

NAME

`psfgettable` – extract the embedded Unicode character table from a console font

SYNOPSIS

psfgettable *fontfile* [*outfile*]

DESCRIPTION

psfgettable extracts the embedded Unicode character table from a .psf format console font into a human readable ASCII file of the format used by **psfaddtable**(1). If the font file name is a single dash (–), the font is read from standard input.

SEE ALSO

setfont(8), **psfaddtable**(1), **psfstriptime**(1), **psfxtable**(1)
