

**NAME**

git-verify-tag – Check the GPG signature of tags

**SYNOPSIS**

*git verify-tag* [--format=<format>] <tag>...

**DESCRIPTION**

Validates the gpg signature created by *git tag*.

**OPTIONS**

--raw

Print the raw gpg status output to standard error instead of the normal human-readable output.

-v, --verbose

Print the contents of the tag object before validating it.

<tag>...

SHA-1 identifiers of Git tag objects.

**GIT**

Part of the **git**(1) suite
