

NAME

Dpkg::Exit – program exit handlers

DESCRIPTION

The Dpkg::Exit module provides support functions to run handlers on exit.

FUNCTIONS

`push_exit_handler($func)`

Register a code reference into the exit function handlers stack.

`pop_exit_handler()`

Pop the last registered exit handler from the handlers stack.

`run_exit_handlers()`

Run the registered exit handlers.

CHANGES**Version 1.01 (dpkg 1.17.2)**

New functions: `push_exit_handler()`, `pop_exit_handler()`, `run_exit_handlers()`

Deprecated variable: `@handlers`

Version 1.00 (dpkg 1.15.6)

Mark the module as public.
