

NAME

`unicode_stop` – revert keyboard and console from unicode mode

SYNOPSIS

`unicode_stop`

DESCRIPTION

The **`unicode_stop`** command will more-or-less undo the effect of **`unicode_start`**. It puts the keyboard in ASCII (XLATE) mode, and clears the console UTF-8 mode.

SEE ALSO

`kbd_mode(1)`, **`unicode_start(1)`**, **`utf-8(7)`**, **`setfont(8)`**
