

**NAME**

ppdhtml – cups html summary generator (deprecated)

**SYNOPSIS**

**ppdhtml** [ **-D** *name[=value]* ] [ **-I** *include-directory* ] *source-file*

**DESCRIPTION**

**ppdhtml** reads a driver information file and produces a HTML summary page that lists all of the drivers in a file and the supported options. **This program is deprecated and will be removed in a future release of CUPS.**

**OPTIONS**

**ppdhtml** supports the following options:

**-D** *name[=value]*

Sets the named variable for use in the source file. It is equivalent to using the *#define* directive in the source file.

**-I** *include-directory*

Specifies an alternate include directory. Multiple *-I* options can be supplied to add additional directories.
