

NAME

XtDisplayStringConversionWarning – issue a conversion warning message

SYNTAX

```
void XtDisplayStringConversionWarning(Display* display, String from_value, to_type);
```

ARGUMENTS

<i>display</i>	Specifies the display connection with which the conversion is associated.
<i>from_value</i>	Specifies the string that could not be converted.
<i>to_type</i>	Specifies the target representation type requested.

DESCRIPTION

The **XtDisplayStringConversionWarning** function issues a warning message using **XtAppWarningMsg** with name “conversionError”, type “string”, class “XtToolkitError, and the default message string “Cannot convert “*from_value*” to type *to_type*”.

To issue other types of warning or error messages, the type converter should use **XtAppWarningMsg** or **XtAppErrorMsg**.
