

NAME

dep3changelog – generate a changelog entry from a DEP3-style patch header

SYNOPSIS

dep3changelog *patch* [*patch ...*] [*options*] [-- [*dch_options*]]

DESCRIPTION

dep3changelog extracts the DEP3 patch headers from the given *patch* files and builds a changelog entry for each patch. If the patch author differs from the one detected from the **DEBEMAIL**, **NAME**, **DEBEMAIL**, or **EMAIL** environment variables, “Thanks to *author* <*email*>” is added to the changelog entry for that patch. Any **bug-debian** or **bug-ubuntu** fields are added as “Closes” to the changelog entry. The generated changelog entries are passed to **debchange** as an argument along with the given *dch_options*.

OPTIONS

--help, -h

Display a help message and exit successfully.

--version

Display version and copyright information and exit successfully.

ENVIRONMENT

DEBEMAIL, **EMAIL**, **DEBFULLNAME**, **NAME**

See the above description of the use of these environment variables.

AUTHOR

Steve Langasek <vorlon@debian.org>
