

NAME

FcPatternGetWithBinding – Return a value with binding from a pattern

SYNOPSIS

```
#include <fontconfig/fontconfig.h>
```

```
FcResult FcPatternGetWithBinding (FcPattern *p, const char *object, int id, FcValue *v, FcValue-  
Binding *b);
```

DESCRIPTION

Returns in *v* the *id*'th value and *b* binding for that associated with the property *object*. The Value returned is not a copy, but rather refers to the data stored within the pattern directly. Applications must not free this value.

SINCE

version 2.12.5
