

NAME

gdebi – Simple tool to install deb files

SYNOPSIS

gdebi [*package.deb*]...

DESCRIPTION

gdebi lets you install local deb packages resolving and installing its dependencies. apt does the same, but only for remote (http, ftp) located packages. It can also resolve build-depends of debian/control files.

OPTIONS

--version

Show program's version number and exit.

-h, --help

Show this help message and exit.

--n, --non-interactive

Run non-interactive (dangerous!).

--o APT_OPTS, --option=APT_OPTS

Set an APT configuration option.

--q, --quiet

Do not show progress information.

--apt-line

Simulate only and print a apt-get install compatible line to stderr.

--root=ROOTDIR

Use alternative root dir.

EXAMPLES

gdebi foo_1.0_all.deb

gdebi foo-1.0/debian/control
