DESCRIPTION

These functions calculate the principal value of the arc tangent of x ; that is the value whose tangent is x .

RETURN VALUE

On success, these functions return the principal value of the arc tangent of x in radians; the return value is in the range $[-\pi/2, \pi/2]$.

If x is a NaN, a NaN is returned.

If x is $+0$ (-0), $+0$ (-0) is returned.

If x is positive infinity (negative infinity), $+\pi/2$ ($-\pi/2$) is returned.

ERRORS

No errors occur.
