

NAME

`ibv_get_device_guid` – get an RDMA device's GUID

SYNOPSIS

```
#include <infiniband/verbs.h>
```

```
uint64_t ibv_get_device_guid(struct ibv_device *device);
```

DESCRIPTION

`ibv_get_device_name()` returns the Global Unique Identifier (GUID) of the RDMA device *device*.

RETURN VALUE

`ibv_get_device_guid()` returns the GUID of the device in network byte order.

SEE ALSO

`ibv_get_device_list(3)`, `ibv_get_device_name(3)`, `ibv_open_device(3)`
