

NAME

icuinfo – Shows some basic info about the current ICU

SYNOPSIS

icuinfo [**-h**, **-?**, **--help**] [**-V**, **--version**] [**-c**, **--copyright**] [**-i**, **--icudatadir** *directory*] [**-v**, **--verbose**] [**-L**, **--list-plugins**] [**-m**, **--millisecond-time**] [**-K**, **--cleanup**]

DESCRIPTION

icuinfo prints basic information about the current version of ICU.

OPTIONS

-h, **-?**, **--help**

Print help about usage and exit.

-V, **--version**

Print the version of **icuinfo** and exit.

-c, **--copyright**

Embeds the standard ICU copyright into the *output-file*.

-v, **--verbose**

Display extra informative messages during execution.

-i, **--icudatadir** *directory*

Look for any necessary ICU data files in *directory*. For example, the file **pnames.icu** must be located when ICU's data is not built as a shared library. The default ICU data directory is specified by the environment variable **ICU_DATA**. Most configurations of ICU do not require this argument.

-L, **--list-plugins**

If specified, list and diagnose issues with ICU plugins.

-K, **--cleanup**

Attempt to unload plugins before exiting.

-m, **--millisecond-time**

Print the current UTC time in milliseconds.
