

NAME

`gdebi-gtk` – Simple tool to install deb files

SYNOPSIS

gdebi-gtk [*package.deb*]...

DESCRIPTION

`gdebi` lets you install local deb packages resolving and installing its dependencies. `apt` does the same, but only for remote (http, ftp) located packages.

OPTIONS

-h, --help

Show this help message and exit.

--n, --non-interactive

Run non-interactive (dangerous!).

--auto-close

Auto close when the install is finished.

--datadir=DATADIR

Use alternative datadir.

-r, --remove

Remove selected package.
