

NAME

XtAppReleaseCacheRefs – decrement reference counts for resources

SYNTAX

```
void XtAppReleaseCacheRefs(XtAppContext app_context, XtCacheRef* refs);
```

ARGUMENTS

app_context Specifies the application context.

refs Specifies the list of cache references to be released.

DESCRIPTION

XtAppReleaseCacheRefs decrements the reference count for the conversion entries identified by the *refs* argument. This argument is a pointer to a NULL-terminated list of **XtCacheRef** values. If any reference count reaches zero, the destructor, if any, will be called and the resource removed from the conversion cache.
