

NAME

bcmp, bcopy, bzero, memccpy, memchr, memcmp, memcpy, memfrob, memmem, memmove, memset – byte string operations

SYNOPSIS

```
#include <string.h>
```

```
int bcmp(const void *s1, const void *s2, size_t n);
```

```
void bcopy(const void *src, void *dest, size_t n);
```

```
void bzero(void *s, size_t n);
```

```
void *memccpy(void *dest, const void *src, int c, size_t n);
```

```
void *memchr(const void *s, int c, size_t n);
```

```
int memcmp(const void *s1, const void *s2, size_t n);
```

```
void *memcpy(void *dest, const void *src, size_t n);
```

```
void *memfrob(void *s, size_t n);
```

```
void *memmem(const void *haystack, size_t haystacklen,  
             const void *needle, size_t needlelen);
```

```
void *memmove(void *dest, const void *src, size_t n);
```

```
void *memset(void *s, int c, size_t n);
```

DESCRIPTION

The byte string functions perform operations on strings (byte arrays) that are not necessarily null-terminated. See the individual man pages for descriptions of each function.

NOTES

The functions **bcmp()**, **bcopy()** and **bzero()** are obsolete. Use **memcmp()**, **memcpy()** and **memset()** instead.

SEE ALSO

bcmp(3), **bcopy(3)**, **bzero(3)**, **memccpy(3)**, **memchr(3)**, **memcmp(3)**, **memcpy(3)**, **memfrob(3)**, **memmem(3)**, **memmove(3)**, **memset(3)**

COLOPHON

This page is part of release 5.02 of the Linux *man-pages* project. A description of the project, information about reporting bugs, and the latest version of this page, can be found at <https://www.kernel.org/doc/man-pages/>.
