

**NAME**

FcFreeTypeCharSet – compute Unicode coverage

**SYNOPSIS**

```
#include <fontconfig.h> #include <fcfreetype.h>
```

```
FcCharSet * FcFreeTypeCharSet (FT_Face face, FcBlanks *blanks);
```

**DESCRIPTION**

Scans a FreeType face and returns the set of encoded Unicode chars. FcBlanks is deprecated, *blanks* is ignored and accepted only for compatibility with older code.
