

NAME

aa-remove-unknown – remove unknown AppArmor profiles

SYNOPSIS

aa-remove-unknown [option]

DESCRIPTION

aa-remove-unknown will inventory all profiles in /etc/apparmor.d/, compare that list to the profiles currently loaded into the kernel, and then remove all of the loaded profiles that were not found in /etc/apparmor.d/. It will also report the name of each profile that it removes on standard out.

OPTIONS

- h, --help
displays a short usage statement.
- n dry run; only prints the names of profiles that would be removed

EXAMPLES

```
$ sudo ./aa-remove-unknown -n
Would remove 'test//null-/usr/bin/whoami'
Would remove 'test'

$ sudo ./aa-remove-unknown
Removing 'test//null-/usr/bin/whoami'
Removing 'test'
```

BUGS

None. Please report any you find to Launchpad at <<https://bugs.launchpad.net/apparmor/+filebug>>.
