

NAME

XtSessionGetToken, XtSessionReturnToken – token management for checkpointing

SYNTAX

```
XtCheckpointToken XtSessionGetToken(Widget w, int type);
```

```
void XtSessionReturnToken(XtCheckpointToken token);
```

ARGUMENTS

<i>w</i>	Specifies the session widget.
<i>type</i>	Specifies the value in the type field of the token.
<i>token</i>	Specifies the token to be returned.

DESCRIPTION

The **XtSessionGetToken** function will return NULL if the checkpoint operation instigated by the session manager is not currently under way.

To indicate the completion of a deferred save operation and to return the checkpoint token use **XtSessionReturnToken**.
