

NAME

ischroot – detect if running in a chroot

SYNOPSIS

ischroot [--default=false] [--default=true] [--help] [--version]

DESCRIPTION

ischroot detects if it is currently running in a chroot. The exit status is:

- 0 if currently running in a chroot
- 1 if currently not running in a chroot
- 2 if the detection is not possible (On GNU/Linux this happens if the script is not run as root).

OPTIONS

-f, --default=false

Exit with status 1 if the detection is not possible.

-t, --default=true

Exit with status 0 if the detection is not possible.

--help Print a usage message on standard output and exit successfully.

--version

Print version information on standard output and exit successfully.

BUGS

On GNU/Linux, chroot detection is not possible when not root. This works correctly on GNU/Hurd and GNU/kFreeBSD.
