

NAME

Log::Any::Adapter::Stdout – Simple adapter for logging to STDOUT

VERSION

version 1.707

SYNOPSIS

```
use Log::Any::Adapter ('Stdout');

# or

use Log::Any::Adapter;
...
Log::Any::Adapter->set ('Stdout');

# with minimum level 'warn'

use Log::Any::Adapter ('Stdout', log_level => 'warn' );
```

DESCRIPTION

This simple built-in Log::Any adapter logs each message to STDOUT with a newline appended. Category is ignored.

The `log_level` attribute may be set to define a minimum level to log.
