

NAME

fzdefaults.xml – Default options for FileZilla

SYNOPSIS

/etc/filezilla/fzdefaults.xml

~/.filezilla/fzdefaults.xml

DESCRIPTION

This configuration file can be used to specify some system-wide default options for FileZilla:

- Location of user's settings directory
- Predefined list of Sitemanager entries
- Kiosk mode to prevent FileZilla from saving any passwords
- Disabling of update check capability

Please search for the file **fzdefaults.xml.example** for further information. It is often found in the /usr/share/filezilla/docs directory.

SUPPORT

Please visit <https://filezilla-project.org/> for further information. Report bugs only if you are using the latest version available from the FileZilla website.
