

NAME

alsa-info.sh – command–line utility to gather information about the ALSA subsystem

SYNOPSIS

alsa-info.sh [*options*]

DESCRIPTION

alsa-info.sh is a command–line utility gathering information about the ALSA subsystem. It is used mostly for debugging purposes.

OPTIONS

- upload**
Upload contents to the server (www.alsa-project.org or pastebin.ca).
- no-upload**
Do not upload contents to the remote server.
- stdout**
Print information to standard output.
- output FILE**
Specify file for output in no-upload mode.
- debug**
Run utility as normal, but will not delete file (usually /tmp/alsa-info.txt).
- with-aptplay**
Includes output from *aptplay -l*.
- with-amiixer**
Includes output from *amiixer*.
- with-alsactl**
Includes output from *alsactl*.
- with-configs**
Includes output from *~/.asoundrc* and */etc/asound.conf* if they exist.
- update**
Check server for updates.
- about**
Print information about authors.

EXAMPLES

alsa-info.sh --no-upload
Will gather all information and show the output file.
