

NAME

upower – UPower command line tool

SYNOPSIS

upower [--dump] [--enumerate] [--monitor-detail] [--monitor] [--show-info] [--version]
[--wakeups] [--help]

DESCRIPTION

upower is a simple command line client for the **UPower**(7) daemon. TODO: not fully documented.

OPTIONS**--monitor**

Connect to the UPower daemon and print a line every time a power source is added, removed or changed.

--monitor-detail

Like **--monitor** but prints the full details of the power source whenever an event happens.

--help

Show help options.

AUTHOR

Written by David Zeuthen <davidz@redhat.com> with a lot of help from many others.

BUGS

Please send bug reports to either the distribution or the DeviceKit mailing list, see <http://lists.freedesktop.org/mailman/listinfo/devkit-devel> on how to subscribe.
