

NAME

FcUtf8Len – count UTF-8 encoded chars

SYNOPSIS

```
#include <fontconfig/fontconfig.h>
```

```
FcBool FcUtf8Len (FcChar8 *src, int len, int *nchar, int *wchar);
```

DESCRIPTION

Counts the number of Unicode chars in *len* bytes of *src*. Places that count in *nchar*. *wchar* contains 1, 2 or 4 depending on the number of bytes needed to hold the largest Unicode char counted. The return value indicates whether *src* is a well-formed UTF8 string.
