

NAME

c89 – ANSI (1989) C compiler

SYNOPSIS

c89 [-pedantic] [-pedantic-errors] [-D_ANSI_SOURCE] options ...

DESCRIPTION

Calls the C compiler (cc) with the given **options** , using a C language environment compatible with the -ansiC specification.

This includes proper handling of trigraphs, disabling non-ANSI compiler features (such as **asm** , **inline** , **typeof** , and the \$ character in identifiers), and definition of the preprocessor symbol `__STRICT_ANSI__` .

SEE ALSO

cc(1) for a description of all options.

HISTORY

Appeared in NetBSD 1.4 .

BUGS

Since **c89** is a shell wrapper script to **cc** , compile errors are prefixed by "cc:".
