

NAME

motd – message of the day

DESCRIPTION

The contents of */etc/motd* are displayed by **pam_motd(8)** after a successful login but just before it executes the login shell.

The abbreviation "motd" stands for "message of the day", and this file has been traditionally used for exactly that (it requires much less disk space than mail to all users).

On Debian GNU/Linux, dynamic content configured at */etc/pam.d/login* is also displayed by *pam_exec*.

FILES

/etc/motd
/etc/pam.d/login

SEE ALSO

login(1), **issue(5)**, **pam_motd(8)**

COLOPHON

This page is part of release 5.02 of the Linux *man-pages* project. A description of the project, information about reporting bugs, and the latest version of this page, can be found at <https://www.kernel.org/doc/man-pages/>.
