

**NAME**

systemd-binfmt.service, systemd-binfmt – Configure additional binary formats for executables at boot

**SYNOPSIS**

systemd-binfmt.service

/lib/systemd/systemd-binfmt

**DESCRIPTION**

systemd-binfmt.service is an early boot service that registers additional binary formats for executables in the kernel.

See **binfmt.d(5)** for information about the configuration of this service.

**OPTIONS****--cat-config**

Copy the contents of config files to standard output. Before each file, the filename is printed as a comment.

**--no-pager**

Do not pipe output into a pager.

**-h, --help**

Print a short help text and exit.

**--version**

Print a short version string and exit.
