NAME

systemd-system-update-generator – Generator for redirecting boot to offline update mode

SYNOPSIS

/lib/systemd/system-generators/systemd-system-update-generator

DESCRIPTION

systemd–system–update–generator is a generator that automatically redirects the boot process to system–update.target, if /system–update exists. This is required to implement the logic explained in the **systemd.offline-updates**(7).

systemd–system–update–generator implements **systemd.generator**(7).
