NAME

fseeko, ftello - seek to or report file position

SYNOPSIS

```
#include <stdio.h>
```

int fseeko(FILE *stream, off_t offset, int whence);

off_t ftello(FILE *stream);

Feature Test Macro Requirements for glibc (see **feature_test_macros**(7)):

fseeko(), ftello():

```
_FILE_OFFSET_BITS == 64 || _POSIX_C_SOURCE >= 200112L (defining the obsolete _LARGEFILE_SOURCE macro also works)
```

DESCRIPTION

The **fseeko**() and **ftello**() functions are identical to **fseek**(3) and **ftell**(3) (see **fseek**(3)), respectively, except that the *offset* argument of **fseeko**() and the return value of **ftello**() is of type *off_t* instead of *long*.

On some architectures, both *off_t* and *long* are 32-bit types, but defining **_FILE_OFFSET_BITS** with the value 64 (before including *any* header files) will turn *off_t* into a 64-bit type.

RETURN VALUE

On successful completion, **fseeko**() returns 0, while **ftello**() returns the current offset. Otherwise, -1 is returned and *errno* is set to indicate the error.

ERRORS

See the ERRORS in **fseek**(3).

VERSIONS

These functions are available under glibc since version 2.1.

ATTRIBUTES

For an explanation of the terms used in this section, see **attributes**(7).

Interface	Attribute	Value
fseeko(), ftello()	Thread safety	MT-Safe

CONFORMING TO

POSIX.1-2001, POSIX.1-2008, SUSv2.

SEE ALSO

fseek(3)
