# **NAME**

msexpand – decompress data compressed using mscompress(1) or COMPRESS.EXE

# **SYNOPSIS**

```
msexpand [ -h ]
msexpand [ -V ]
msexpand [ name ... ]
```

# **DESCRIPTION**

*Msexpand* decompress files compressed using **mscompress(1)** or Microsoft **COMPRESS.EXE** utility (e.g. Windows 3.x installation files). If no files are specified, the standard input is decompressed to the standard output.

# **AUTHORS**

This program is written by Martin Hinner, <mhi@penguin.cz> Algorithm & data structures by M. Winterhoff <100326.2776@compuserve.com>

# **DOWNLOAD**
